## SUMMARY

Results-driven Computer Science graduate and ITI Full-Stack Python graduate, equipped with solid experience in building full-Stack web applications using Python, Django, HTML, CSS, JavaScript, and React. Proven ability to design, develop, and deploy user-focused solutions with clean, maintainable code. Skilled in both front- and back-end development, with hands-on practice in team-based projects, version control, and responsive design. Strong communication and leadership skills, complemented by creative experience in content creation through a YouTube movie review channel.

## SKILLS

**Languages:** HTML, CSS, JavaScript, Python, SQL, Java, C# Dart.

**Technologies:** React, jQuery, Bootstrap, Tailwind, MySQL, XML, SQL Server, Flutter, Git

**Methodologies:** Agile, SOLID principles, responsive design, component-based architecture

## EDUCATION

9/2020 - 6/2024 **Bachelor's degree in computer science, Faculty of Science** **Alexandria University**  
- Graduated with Distinction (Honors)  
- Graduation Project: Firelancer (Freelancing platform):

9/2022 - 12/2022 **Flutter Diploma** **Amit Learning**  
- Completed training in Flutter development, focusing on cross-platform mobile application basics.  
- Built and deployed basic applications for both Android and iOS using a single codebase.

## EXPERIENCE

7/2023 - 8/2023 **Native Mobile Development Trainee** **Information Technology Institute (ITI)**  
- Developed and optimized native Android applications, improving user experience and performance.  
- Implemented new features, troubleshooted issues, and ensured app compatibility with the latest Android updates.

3/2025 - Present **Full-Stack Python Trainee** **Information Technology Institute (ITI)**  
- Built and deployed full-stack web applications using Python, Django, HTML, CSS, and JavaScript.  
- Gained hands-on experience in frontend frameworks such as React and jQuery.  
- Practiced version control, agile development, and team collaboration on real-world projects.  
- Applied responsive design principles to create user-friendly interfaces across devices.[1pt]

## PROJECTS

**Firelancer – Freelancing Platform** *SQL Server, ERD, Stored Procedures*

Designed and implemented the database layer for a freelancing platform connecting clients with service providers. Responsible for data modeling, writing complex SQL queries, stored procedures, and ensuring data consistency across modules such as user profiles, job postings, and payments.

*Project Link:* <https://firelancer-client.vercel.app/ar>

**To-Do List** *JavaScript, Html, CSS*

A simple, elegant to-do list application built with vanilla JavaScript, HTML, and CSS. This project allows users to add tasks, mark them as completed, and delete them, with all data persisted across page refreshes using localStorage. Features a clean, modern UI with a responsive design, smooth hover effects, and intuitive task management.

**Movie Guide App** *JavaScript, Html, CSS, OMDb API*

Developed a responsive web application that allows users to search for movies or series and view detailed information fetched from the OMDb API. Implemented IMDb ratings, genre and cast display, poster preview, and mobile-first design. Integrated a promotional YouTube section for the Nerd Aflam channel.

*Project Link:* <https://abdelsalam101.github.io/movie-guide-app/>

**WeatherX** *JavaScript, Html, CSS, OpenWeather API*

Collaborated in a team to develop a weather forecasting web application. Designed and implemented the user interface using HTML and CSS to ensure a responsive and visually appealing layout. Contributed to JavaScript logic for dynamic data rendering from the OpenWeather API.
